

- Metadata file created using METAMAKER, Version: Beta 0.9 -

Metadata name : Test data
Date : 2026-08-14
Measurement location : Paris, xxxx
Contact person : nboudjem, cactus
Email : familyname.name@gmail.com
Logbook file name : Logbook.zip
Logbook location : www.xxxx.com/logbooks
Raw data location : www.xxxx.com/data
Raw data PID : 123456789
Number of datasets : 2

- Participators -

nboudjem, cactus

- Data description -

This is just some test data
including three datasets.

- Instrument -

Lenovo laptop, running Ubuntu 24.04.2 LTS
Program written in python3

- Notes -

The program uses non-standard Python3 packages:
Tkinter
reportlab
Change this program to python3 someday

- Tags / Keywords -

metadata, test, python

- DATASET 1 -

Dataset name : Dataset1
Dataset files : File1.txt-File10.txt
Spectrometer : Lenovo T450s
Is data publishable : No

- Sample description -

General test data, made from random words

- Experiment settings -

Linux running fine.
This test done using executable made by:
pyinstaller

- Experiment description -

- Notes / Problems -

None, so far

- DATASET 2 -

Dataset name : Dataset2
Dataset files : File11.txt-File20.txt
Spectrometer : Lenovo T450s
Is data publishable : No

- Sample description -

More general test data, made from random words

- Experiment settings -

Linux running fine.

- Experiment description -

Testing dataset for distribution:

1
2
3
4
5
6

- Notes / Problems -

None, so far
